Index to Volume 5: Subject

Adaptation, postpartum, 201
Adolescents
  pregnant, loneliness among, 112–114
  self-concepts of, 111
  sense of future and, 111
  urban, health needs of, 170–175
Advocacy, in public health nursing, 89–90
Age, of medicare-eligible home care participants, 130–131, 133
Aging population. *See* Elderly
Alzheimer's disease
  clinical manifestations of, 147
  nursing plan for, 149
  role supplementation intervention, 149–151
American Nurses' Association (ANA), definition of public/community public health nursing, 153
American Public Health Association (APHA), definition of public/community public health nursing, 153–154
Appalachian community, beliefs and attitudes of elderly, 45–50
Arizona, legal definition of elder abuse, 224
Arthritis Self-Care Project, 242–244
Assessment
  of family in Alzheimer's disease case, 147–148
  of health in low-income children, efficacy of PHN field service, 209–212
  of public health nurse job satisfaction, 230–234
Autonomy, in public health nursing, 89

Baccalaureate curriculum, for public health nursing, 153–159
Barriers
  in dissemination of CHN findings, 243–244
  in providing care to low-income families, 15
Behavior, leadership, 54–55
Block clinics, vs. integrated clinics, 76–80
Books, on public health nursing, 82–84
Business methods, in visiting nurse associations, 186–188

CAI (Coordination Activities Inventory), 19
Caregiving paradigm, elder abuse and, 227–228
Chance health locus of control scale (CHLC), 38–39
Child abuse, vs. elder abuse, 223–224
CHLC (chance health locus of control scale), 38–39
Client
  in Neuman systems model, 30–31
  reconceptualizing as community, 50
Climate, nursing productivity and, 58, 59
Clinical laboratory activities, structuring for baccalaureate students, 160–169
Communication flow, nursing productivity and, 53–54
Community Competence Project, 242
Community health nurse
  contact initiation by mother, comfort in, 196–197
  role of, perceptions for, 46, 194–199
Community health nursing
  competing methodologies, 242–243
  definition of, 153–154
  dissemination of findings, barriers in, 243–244
  domain ambiguity in, 241–242
  outcomes, measurement problems for, 242
  research environment, uncertainty of, 243
  revelance of health beliefs and attitudes on aging and, 49–50
  rural mothers' perceptions and postpartum use of services, 193–199
Consultation patterns, of nurse practitioners, 95–96, 99–102
Coordination, within health organizations, 55
Coordination Activities Inventory (CAI), 19
Coping strategies, effectiveness for mothers of preschool children, 104–108
Cost reduction methods, for visting nurse associations, 186–187
Counseling
  on health promotion by occupational health nurses, measurement of, 177–184
  by nurse practitioners, 20, 22
Credibility, of ethnographic studies, 143–144

Culture
  beneficial beliefs, reinforcement of, 50
  influence on aging, 46
  Nicaraguan, health care in, 118–120
  Samoan, 220
Curriculum
  baccalaureate, for public health nursing, 153–159
  nurse practitioner, 102
  structuring of clinical laboratory activities, 160–169

Decision-making process, 53
Dependency, elder abuse and, 226–227
Diabetes, management by nurse practitioners, 98, 101
Diagnosis-related groups, for medicare-eligible home care participants, 133, 134
Documentation, for home care visits, 65–66
DRGs, for medicare-eligible home care participants, 133, 134

Early and Periodic Screening, Diagnosis, and Treatment program (EPSDT), 210
Education
  development for public health nursing, 88
  of nurse practitioners, 91–92
  public health nursing, baccalaureate, paradigm for, 153–159
Educational level of nurse, job satisfaction and, 232, 234
Elder abuse, difficulties in dealing with, 222–223
Elderly
  in Appalachian community, beliefs and attitudes of, 45–50
  CHN role, perceptions of, 46
  home health care perceptions, 140–144
  in Samoan culture, impact of urbanization on, 219–221
Employment status, job satisfaction and, 233
Environment, in Neuman systems model, 31
EPSDT (Early and Periodic Screening, Diagnosis, and Treatment program), 210
Ethics, professional, 89–90
Ethnograph, 141

Ethnography
definition of, 141
trustworthiness and credibility of studies, 143–144
Exercise of self-care agency (ESCA), 37, 39–43

Family
assessment of, in Alzheimer's disease case, 147–148
disequilibrium, from illness of family member, 69
low-income, barriers in providing care, 15
Neuman systems model for, clinical use of, 33–36
postpartum social support of, 201–207
qualities, success in high-tech home care and, 71–74
Family-assessment tools, 69
Family violence paradigm, components of, 223–227
Fathers, postpartum support role, 201–207
Field services, impact as an intervention, 210–212
Functional status, of medicare-eligible home care participants, 130–134
Future Time Perspective Inventory, results for pregnant teenagers, 112–114

Grandparents, postpartum support role, 201–207
Group cohesiveness, fostering of, 55
Group conferences
definition of, 12
effective teaching method in, 13
nominal group process for, 13–14
Group process
definition of, 55
quality of, nurse productivity and, 58–59

HCFA (Health Care Finance Administration), 67
Health, in Neuman systems model, 31
Health assessments, of low-income chidren, efficacy of PHN field service, 209–212
Health Belief Model, 7, 8, 210
Health beliefs and attitudes, in Appliachian community, 45–50
Health Care Finance Administration (HCFA), 67
Health habits counseling questionnaire (HHCQ), measurement of OHN counseling, 177–184
Health maintenance activities perceptions, of elderly, 49
Health needs identification, for urban adolescents, 170–175
Health problem perceptions, of elderly home care patients, 142–143
Health promotion
by nurse practitioners, 18, 20–22
in primary care nursing, 17–22
Health Promotion Inventory (HPI), 19
Health value, 38–39
Henry Street Settlement, 87, 88, 89
HHCQ (Health habits counseling questionnaire), measurement of OHN counseling, 177–184
Home care, high-tech, success in, 68–74
Home care nursing
patient classification systems, 135–136
perceptions of older adults, 140–144
salaries in, 65
state and local government support, 66–67
workplace dissatisfaction, 65–66
Home visits. *See also* Visiting nurse services
documentation for, 65–66
as follow-up for early discharged low-birth weight infants, outcome of, 209
length of, 135, 138–139
Medicare prospective payment system and, 135
for pregnant women, 210
student anticipations, expectations and feelings of experience, 214–218
Human resources primacy, 54
Hypertension, management by nurse practitioners, 97, *100*, *101*

Ill client activities, of nurse practitioners, 94, 96–98, 101–102
Impact of community nursing services, assessment challenges, 241–244
Independence, perceptions of, by elderly home care patients, 142–143
Infant risk factors, analysis of, 165–169
Infants, low-birth weight, outcome of home visit follow-ups, 209
Integrated clinics, definition of, 76–77
Internality health locus of control scale (IHLC), 38–39

Job enrichment, 60
Job-esteem, of home care nurses, 66
Job satisfaction assessment, of public health nurses, 230–234

Leadership
enhancement of nursing productivity, 59–60
evaluation of, 62–63
peer, 55
supervisory, 54–55
Legal aspects, of elder abuse, 224–226
Life stress, elder abuse and, 226–227
Literature, on public health nursing, development of, 81–85
Living arrangements, of medicare-eligible home care participants, 130, 131, 133
Locus of control, 38–39
Loneliness, predictors in pregnant teenagers, 110–115
Low-birth weight infants, outcome of home visit follow-ups, 209

Magazines, for visiting nurses, 82–83, 85
Marital status
job satisfaction and, 233
of medicare-eligible home care participants, 130, 131, 133
Medical diagnosis, for medicare-eligible home care participants, 130, 132–134
Medical Intervention Model, in family violence paradigm, 226
Medicare, literature review, 129
Medicare home care population, characteristics of, 129–134
Mental health-psychiatric nursing students, cross-clinical practicum for, *160–169*
Metropolitan Life Insurance Company Visiting Nurse Service
clinical excellence of, 237
cost, issue of, 237–238
decline of, 238–239
origin of, 236–237
MHLC (Multidimensional health locus of control scale), 38–39
Midwives, job satisfaction of, 233, 234
Mobility, independence of elderly home care patients and, 143

Mothers
education level of, effect on coping process, 107
high-risk expectant, health beliefs among, 7–11
sources of help with infant care and household tasks, 201–207
Mothers' Health Orientation, 9
Motivational conditions, in organizational climate, 54
Multidimensional health locus of control scale (MHLC), 38–39
Multiparae, receipt of postpartum help as support, 204–205, 207

Neglect, elder abuse and, 225
Neuman systems model
clinical use of individual and family, 33–36
criteria for determining focus, 32–33
inherent concepts, 30–32
nursing process and, 33
Nicaragua
health care differences in, 118–120
health care system of, 116–117
journey to, 118
preparation for nursing assignment in, 117–118
Nightingale, Florence, 81–82
Nominal group process
description of, 12–13
step by step method, 13
Nurse-administrator, job satisfaction of, 233, 234
Nurse practitioners
activities and consultation patterns, 91–103
coordination activities of, 19, 21
counseling activities of, 20, 22
educational activities of, 22
educational changes for, 91–92
health promotion activities of, 18, 20–22
job satisfaction of, 233, 234
traditional activities of, 17–18
Nursing. *See also specific types of nursing*
in Neuman systems model, 31–32
Nursing care perceptions, by elderly home care patients, 141–142
Nursing diagnosis, of Alzheimer's disease case, 148–149
Nursing productivity
background, 53–57
enhancement of, 59–60
measurement, 57–59
Nursing students
application of nominal group process, 13–15
attrition, 191
baccalaureate, cross-clinical practicum for, 160–169
cross-clinical practicum for, 160–169

Occupational health nurses, counseling on health promotion, measurement of, 177–184
Organizational processes, 56–57
Organization climate
evaluation of, 62
nurse productivity and, 53–54

Parental coping, effectiveness for mothers of preschool children, *104–108*
Patient classification systems, for home *care nursing*, 135–136
Pediatric Nurse practitioners, health *promotion activities of*, 18
Peer leadership
evaluation of, 63
nurse productivity and, 55, 56
Physician counseling, *vs. OHN* counseling on health promotion, 180–184
Postpartum period
comfort in initiating CHN contact by mother, 196–197
initiation of information-seeking from CHN by mother, 196–197
perceived role of CHN, 194–196
sources of help with infant care and household tasks for mother, 201–207
Powerful others health locus of control scale (PHLC), 38–39
Prenatal care services, use by high-risk expectant mothers, 7, 10, 11
Primary caretaker data, of medicare-eligible home care participants, 130, 131, 133
Primary health care nursing
dimensions of, 16
health promotion in, review of literature, 17–18
Primary program assignment, job satisfaction and, 233, 234
Primiparae, receipt of postpartum help as support, 204–205, 207
Problem-Classification Index
development of, 25–27
implications for future research, 28–29
reliability for well mothers and children, 27–28
Productivity of nurse, measurements of, 53, 57
Public health nurses
combating shortages of, 191
job satisfaction assessment, 230–234
Public health nursing
definition of, 153–154
evolution of, 87–90
literature, development of, 81–85
Public support programs, for visting nurse associations, 187

Registered Care Technologist, 127
Reimbursement policies, literature review of, 129
Revised UCLA Loneliness Scale, *results for pregnant teenagers*, 112–114
Role insufficiency, definition of, 147
Roles, definition of, 146
Role supplementation, in assisting family coping in Alzheimer's *disease*, 146–151
Role transition, definition of, 146

Samoans
elderly, impact of urbanization on, 219–221
number in Hawaii, 219
School dental screening, outcome of referrals from telephone follow-up service, 209
Self-care
among faculty women, 37–38
independence and, 50
Self-care agency, 37–38
Self-concept
of adolescents, 111
loneliness among pregnant teenagers and, 112–114
Self-esteem, for home care nurses, 66
Service delivery, in block vs. integrated clinics, 79
Social psychology perspective, of nurse productivity enhancement, 52–60
Sociocultural context, 45–46
Spouse abuse, vs. elder abuse, 223–224
Staff survey, in block vs. integrated clinics, 77, 79–80
Stress
characteristics of event, effect on parental coping, 106–107
elder abuse and, 226–227

from infant birth, 201
in role transition, 146
Supervisory leadership
evaluation of, 62–63
nurse productivity and, 54–56
Surgical procedures, for medicare-eligible home care participants, 130, 133–134

Teaching strategies, for home visit preparation, 214, 217–218
Tennessee Self-Concept Scale, results for pregnant teenagers, 112–114
Trustworthiness, of ethnographic studies, 143–144

Visiting nurse associations
business methods for, 186–188
literature on, 81–82
Visiting nurse service, of Metropolitan Life Insurance Company, 235–239

VNA-LA/USC home health patient-classification system, 136–139

Wald, Lillian
evolution of public health nursing and, 87–90
professional background, 86–87
Well-baby services, use among first-time black mothers, 7
Well client activities, of nurse practitioners, 94, 95, 96, 98
